

The Coffein Compagnie Italy plant is actively engaged in defining and implementing good practices for energy efficiency and continuous improvement of energy performance.

The management is aware that the commitment and involvement of the corporate's management are essential elements for the development and improvement of the Energy Management System and establishes its strategic policies and objectives.

The company's mission is to promote and ensure a continuous commitment to the following objectives in order to improve energy performance while reducing the impact on climate change. In particular, the Company undertakes to:

- comply with applicable legislative requirements and any other subscribed requirements in relation to the use and consumption of energy and energy efficiency.
- reduce energy consumption through management and/or plant interventions on end-use systems, whenever such interventions are feasible from the technical-operational and economic point of view.
- Achieve the efficiency and effectiveness objectives of energy processes, analyzing the results obtained in order to act on potential areas of improvement.
- Regularly monitor, measure and analyse energy performance.
- Ensure the resources, financial and otherwise, to achieve the objectives set.
- Ensure information exchange within and outside

of its facility to ensure the involvement of all staff and suppliers in the continuous improvement process.

- Support the procurement and design of energy efficient products and services that have an impact on energy performance.
- promote the development of an internal culture oriented to saving and the correct use of energy, also supporting this process with appropriate training interventions inserted in the different updating moments of its staff.
- promote awareness initiatives of internal and external staff on the theme of energy saving.
- Assess energy efficiency measures also on the basis of reducing greenhouse gas emissions into the atmosphere.

The policy is disseminated and communicated to staff and stakeholders through appropriate means.

The Management undertakes to completely review the Energy Management system at least once a year to verify the achievement of the objectives and targets set and confirm the validity of this Policy.
